OBJECTIVE

Detail-oriented Full-Stack Developer with a strong background in creating user-friendly web and mobile applications. Seeking to leverage expertise in frontend and backend technologies, along with a commitment to responsive design and performance optimisation, to contribute to innovative projects in a dynamic team environment.

EXPERIENCE

March 2024 - May 2024

Fullstack WordPress Developer
Chiropedic
I developed engaging user interfaces with HTML5, CSS3, and JavaScript, boosting user engagement by 30%. I applied UI/UX best practices to enhance mobile accessibility and satisfaction. I created custom WordPress themes/plugins, improving load times by 25%. I enhanced functionalities through third-party API integrations. I implemented SEO strategies, increasing search ranking by 40%. I established protocols, reducing vulnerabilities by 80%. Utilised MySQL to manage data.

February 2022 - February 2024

Frontend Developer
Reecheble (Pty) Ltd.
I led the development of the React Native apps, achieving over 85% user retention. I created CSS-driven interfaces, reducing feature development time by 40%. I utilised Redux and Context API to enhance responsiveness and lower load times. I integrated Node.js, improving data handling and reducing errors by 30%. I increased team productivity by 20% using Agile methodologies. Employed MongoDB to manage data.

August 2018 - April 2021

Junior Web Developer
Talk360 Africa (Pty) Ltd.
I delivered 5+ high-quality projects using Laravel, Vue.js, WordPress, and PHP. I ensured projects adhered to responsive principles, boosting mobile engagement by 25%. I improved site performance, resulting in a 30% reduction in bounce rates. I streamlined collaboration using Git, reducing integration conflicts by 40%. I maintained comprehensive documentation to enhance onboarding and knowledge transfer. Worked with MySQL to manage data.

EDUCATION

December 2019

Certificate in Developing Web Applications with PHP
University of South Africa (UNISA)
