Neo Mokhele

Frontend Developer

Experienced Full-Stack WordPress developer skilled in frontend and mobile development, with a proven record of delivering high-quality, responsive applications. Proficient in WordPress theme and plugin development, as well as HTML, CSS, JavaScript, and frontend frameworks. Recognised for collaborative work, attention to detail, and commitment to exceptional user experiences. Ready to leverage my skills to drive innovation and exceed project goals in frontend development.

Experience

Talk360 (Pty) Ltd.
Aug 2018 | Feb 2021

Junior Web Developer

I have expertise developing websites, both frontend and backend, with technologies such as Laravel, Vue, WordPress, JavaScript, HTML, CSS, and PHP. I worked with teams to design visually appealing user interfaces and provide seamless user experiences. My tasks include managing and updating WordPress material, customising themes, and integrating plug-ins. I also worked on responsive design, debugging, troubleshooting, performance optimisation, Git version control, team and client collaboration, and code and process documentation.

Reecheble (Pty) Ltd.
Feb 2022 | Feb 2024

Frontend Developer

I specialised in developing and maintaining mobile applications with React Native, ensuring consistent experiences across Android and iOS platforms. I worked together with designers to create visually appealing and intuitive user interfaces using CSS, Tailwind CSS, and responsive design concepts. My experience included creating reusable React Native and React.js components, efficiently managing state with Redux or the Redux Concept API, and writing clean, type-safe code in TypeScript for better maintainability. I excelled in API integration, data management with MongoDB databases, and creating effective navigation flows. With a heavy emphasis on testing, debugging, and Git version control, I contributed to agile development practices that promote efficient project management and communication.

Chiropedic
Mar 2024 | Apr 2024

Full Stack WordPress Developer

I worked directly with clients to understand their needs and transform them into visually attractive user interfaces utilising HTML, CSS, and JavaScript. I used UI/UX best practices to increase user engagement and satisfaction while guaranteeing smooth navigation and interaction. As a backend developer, I used WordPress to create custom themes and plugins, leveraging server-side scripting and efficient database management to ensure optimal performance and scalability. I smoothly connected external APIs and services to enhance website functionality and quickly identify and repair technical difficulties, ensuring continuous operation. In addition, I performed site-audits, applied SEO strategies, and monitored security and performance to drive continual improvement and surpass customer objectives.

Education

Diploma in Information Technology
Jan 2016 | Apr 2019

Damelin

Through a hands-on curriculum, I honed skills in computer science, programming, database management, and networking administration. My course also equipped me with practical expertise in software development, system analysis, and IT project management.

Certificate in Developing Web Applications with PHP
Jun 2019 | Dec 2019

University of South Africa

This comprehensive curriculum covered a wide range of topics, including HTML, CSS, JavaScript, MySQL, Database Development, and PHP. I gained practical experience through hands-on projects, applying theoretical knowledge to real-world scenarios.

Project Detail

Google Search Engine Web App

In the Google Search Engine demo. I developed the comprehensive search engine prototype, utilising HTML, CSS, JavaScript, React.js, RESTFul API, Node.js, and RapidAPI. Link: https://neomokhele-googl-demo.web.app
