OBJECTIVE

Detailed-oriented Frontend Developer with hands-on experience in building responsive web applications using React, Angular Next.js, and modern UI frameworks. Skilled in design translation, performance optimisation, and collaborative Agile workflows. Seeking to contribute innovative, scalable solutions in a forward-thinking team that values clean code, efficiency, and user-focused development.

EXPERIENCE

November 2024 - Current	Intermediate Frontend Developer Bitcube Develop and optimise web applications using Angular, Next.js, and React within a microservices architecture powered by Nest.js. Translate Figma design into responsive, accessible interfaces using TailwindCSS and modern UI frameworks. Collaborate with cross-functional teams in Agile environments using Asana and Slack. Build scalable, interactive UIs with HTML, CSS, JavaScript, and TypeScript. Implement REST APIs, manage databases with MongoDB, and optimise workflows using Vite. Ensure efficient code delivery through Git, GitHub, and CI/CD practices while promoting clean and maintainable code.
March 2024 - May 2024	Fullstack WordPress Developer Chiropedic Collaborated with clients to develop visually engaging interfaces using HTML5, CSS, JavaScript, and PHP. Applied responsive design and UI/UX best practices to enhance user experience across devices. Built custom WordPress themes and plugins for improved performance. Integrated third-party APIs to deliver dynamic, feature-rich websites. Conducted site audits and implemented SEO strategies to boost visibility. Strengthened site security by establishing robust protocols. Proven track record in frontend and backend development, with strong focus on performance, security, and user satisfaction.
February 2022 - March 2024	Frontend Mobile Developer Reecheble (Pty) Ltd. Developed mobile applications using React Native, enhancing user experience and retention. Collaborated with UI/UX designer to build responsive, TailwindCSS based interfaces and reusable React components. Managed application state with Redux and Context Api, improving performance and responsiveness. Integrated Node.js for backend services, enabling efficient data handling and smoother workflows. Working within Agile development environment, contributing to faster delivery cycles and improved team collaboration. Demonstrated strong problem-solving skills, clean code practices, and a user-focused development approach.

August
2018 - April
2021

Junior Web Developer

Talk360 Africa (Pty) Ltd.

Developed and maintained websites using Laravel, Vue, WordPress, JavaScript, HTML5, CSS, MySQL, and PHP, delivering multiple high-quality projects. Applied responsive design best practices to enhance mobile usability and user engagement. Diagnosed and resolved technical issues to improve website performance and reduce bounce rates. Utilised Git for version control to support efficient team collaboration. Maintained clear project documentation to aid knowledge transfer and onboarding. Strong focus on performance optimisation, clean code practices, and user-centric design.
